## Income Statement and Key Ratios

## Strong Net Interest Income Growth

Net interest income was $\$ 568.9$ million for the quarter, up $15.9 \%$ compared to the fourth quarter a year ago, and was $\$ 2.2$ billion for 2017 , up $18.4 \%$ compared to the prior year. The increases in net interest income resulted primarily from growth in average earning assets.

## Net Interest Margin

The net interest margin was $3.08 \%$ for the fourth quarter, compared to $3.09 \%$ for the prior quarter, and $3.16 \%$ for the fourth quarter of 2016. For 2017, the Bank's net interest margin was $3.13 \%$, compared to $3.20 \%$ for the prior year.

## Noninterest Income

Noninterest income was $\$ 130.3$ million for the quarter, up $19.7 \%$ compared to the fourth quarter a year ago, and was $\$ 460.5$ million for 2017 , up $16.6 \%$ compared to the prior year. The increases were primarily from growth in wealth management revenues.

## Noninterest Expense and Efficiency Ratio

Noninterest expense was $\$ 445.5$ million for the quarter, up $23.7 \%$ compared to the fourth quarter a year ago. For 2017, noninterest expense was $\$ 1.6$ billion, up $22.6 \%$ from the prior year. ## Income Taxes

On December 22, 2017, H.R.1, formerly known as the Tax Cuts and Jobs Act (the "Tax Reform Act"), was enacted into law. Beginning in 2018, the Tax Reform Act reduces the federal tax rate for corporations from $35 \%$ to $21 \%$ and changes or limits certain tax deductions. As a result of the lower corporate tax rate, during the fourth quarter of 2017, the Bank recorded a onetime revaluation adjustment of $\$ 39.7$ million to reduce its deferred tax assets, which increased the provision for income taxes.

In addition, during the fourth quarter of 2017, the volume of stock option exercises by Bank employees and directors increased considerably in response to tax reform legislation. This activity resulted in $\$ 50.0$ million of excess tax benefits, which decreased the Bank's provision for income taxes.

The Bank's effective tax rate for the fourth quarter of 2017 was $17.9 \%$, compared to $17.3 \%$ for the prior quarter. The increase in the effective tax rate during the quarter resulted from the one-time revaluation of deferred tax assets, partially offset by the increase in the volume of stock option exercises by Bank employees and directors.

The effective tax rate for 2017 was $16.9 \%$, compared to $18.6 \%$ in 2016 . The decrease in 2017 resulted primarily from the continued growth in tax-advantaged investments during the year. In addition, the decrease in the effective tax rate was the result of the increase in the volume of stock option exercises by Bank employees and directors, partially offset by the onetime revaluation of deferred tax assets.

For 2018, the Bank expects its effective tax rate to be approximately $19 \%$.
